Type: ROUTINE INSPECTION

Date: 23-JUN-2015

3.9

FEEDING.

Sec. 3.9 Feeding. (b)

**** One enclosure containing three dogs has one metal self feeder has excessive rust on the door and bottom and now has jagged edges. The rusted surface inhibits the ability to clean and sanitize properly. The rust can contaminate the food and the jagged edges can injure the dogs while eating. Need to repair or replace the feeder to protect the feed from contamination and prevent the dogs from injuring themselves.

**** Three metal self feeders the doors are bowed in which affects 7 dogs. The bowed door can become lodged and prevent the dogs from gaining access to the feed. Need to repair or replace the doors to allow the dogs free unrestricted access to the feed.

To be corrected by 07-3-2015

Inspection and Exit interview conducted with facility representative.
